

## **COVID 19 ABCO STATEMENT**

Protecting your family and home is at the heart of everything we do, and the safety and well-being of our employees, customers and communities will always be our first priority. As the Coronavirus (COVID-19) begins to have a greater impact on the communities we serve, we have taken additional actions to ensure that we will continue to provide our essential services to protect your family and home safely and without interruption.

In most cases, our services can be performed outside your home without entry or human contact. If entry to your home is required or requested, it can be done with limited human contact.

Our team members remain vigilant with existing health precautions such as regular hand washing and disinfecting service tools and equipment after every home visit. In addition, our team members know that we are committed to taking care of their needs, and they have been advised to stay home if they feel ill or may have come into contact with someone who has been exposed.

We know the safety of your family and comfort of your home is more important now than ever before. Pest activity doesn't stop during this time, and neither will we. We are closely following guidelines from the Centers for Disease Control and Prevention (CDC), the World Health Organization (WHO) and other local and federal health officials. We remain committed to responding to the needs of our customers and employees as this situation evolves.

Thank you for being part of the ABCO Pest Control Family

Eric Fishon  
President
